WHOLESALE PRICE LIST
for 1927-28

ALL PRICES F. O. B. SANTA CRUZ, CALIF.

**TERMS: CASH WITH ORDER OR 25% WITH
ORDER, BALANCE C. O. D., UNLESS
OTHERWISE ARRANGED.**

The distinct advantages of our ornamentals over those usually found are that they are all hardy, open field grown stock, with a well branched root system grown in a cool, even climate. They will not be stunted on transplanting, but take immediate hold, and make larger sized and handsomer ornamentals than the usual pot or can grown shrub from a lathe house.

Only well balled and hardened stock is released from our nursery so that they will transplant well and start to grow rapidly when properly cared for in their new locations.

We will have all types of California native wild shrubs for late winter and spring delivery, and will quote prices on request. Also many new and imported novelties. Let us know your wants.
